

Hi, I'm Julio Castaño

Software Developer

I build pixel-perfect, engaging, and accessible digital experiences.

ABOUT

My journey into coding began in 2016 when I started developing solutions in **C#** and **JavaScript** for local businesses in my area. These businesses needed customized software to streamline their operations, and I quickly found myself immersed in the world of coding, problem-solving, and creating efficient solutions. This hands-on experience not only honed my programming skills but also ignited my passion for technology and its applications in real-world scenarios.

When I began university, I leveraged this foundation to secure several entry-level jobs. These roles allowed me to further develop my expertise and gain valuable industry experience. Balancing my studies with these positions, I continued to learn and grow, driven by a commitment to excellence and a desire to innovate.

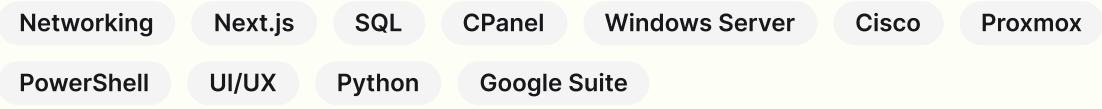

Today, I am a dedicated and enthusiastic developer, constantly seeking new challenges and opportunities to apply my skills. My early start and practical experience have shaped me into a versatile and resourceful professional, ready to contribute to the ever-evolving field of technology.

EXPEIENCES

2021 — PRESENT

Network Administrator · Colegio Loyola Santo Domingo

As a Network Administrator with a passion for crafting software, I've been creating software to meet the expectations of the role, automating tasks, and planning the infrastructure carefully. From design to optimization, I ensure smooth operations and effective connectivity and security.

2022 — PRESENT

Independent Consultant · Dvine Studios [↗](#)

Build and maintain the workflows, servers and storages for the company and aplaying new infrastructure as needed.

2019 - PRESENT

Software Developer · Ozono Quimicos [↗](#)

Developed user-friendly applications across different departments, aimed at maintaining consistent product quality and ensuring the reproducibility of the manufacturing processes.

JUL 2021 - DEC 2021

Developer Intern · Atabey [↗](#)

At Atabay Foundation, I oversaw the implementation of Moodle for online courses and created interactive content. Additionally, I developed a webpage for Inateso using WordPress.

OCT 2019 - APR 2020

Senior Database Manager · Soluflex

As an SQL Database Engineer, I specialized in database design, optimization, and performance tuning. Leveraging SQL expertise, I ensured secure and efficient data management, supporting organizational objectives with seamless database operations.

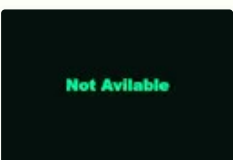

PROJECTS

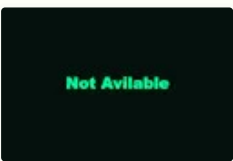

Portfolio

This is my portfolio, created with the help of T3 Stack and Shadcn, it's become a cozy corner to showcase my work. Feel free to browse around, chill out, and enjoy the vibe while checking out what I've been up to.

Color Unit [↗](#)

This application is responsible for ensuring the quality and excellence of Ozono Químicos and its products. It manages everything from inventory to production and later dispatch of orders. This web application was created using Next.js and is the evolution of a previous desktop application made in C#.

Inateso Institute (Atabey Foundation) [↗](#)

This web page was made for the Atabey Foundation as an intership using WordPress, later updated to recive donations via PayPal
